

Vepo Online Backflow Management System

The Vepo Online Backflow Management System is a complete backflow prevention assembly testing, tracking and reporting system utilized by the City that assists in managing the backflow program. All fees are paid by the Backflow Prevention Assembly Tester (BPAT) directly to Vepo. The program provides the online tools necessary to quickly and easily enter backflow test reports and to perform ongoing annual testing of the assemblies.

The Online Backflow Management System is available to insure the water supply is protected with proper backflow testing. The system is approved for the acceptance of backflow test and maintenance reports by the Texas Commission on Environmental Quality (TCEQ).

Registration

Visit the Vepo web site at www.vepollc.com. Click on the Online Backflow Management selection. For BPAT's needing assistance, click on the [Quick Start Guide](#) with information to get you up and operational in no time at all. Please contact Vepo staff at conserve@vepollc.com or by telephone at (281) 476-6886 for more information.
